

## Self-Amplifying RNA Shots Are Coming: The Untold Danger

### Description

The truth behind RNA-based vaccine technology (Part 3)

*From time to time, I publish contributions from other scientists and authors who seem to me to be appropriate to topics that are of current concern to me and on which I myself can provide less competent information. Prof. Klaus Steger is a molecular biologist and has published a three-part article on Covid-19 vaccines and the active principles of modRNA (nucleoside-modified mRNA) in the English version of "Epoch-Times". I find these texts very informative.*

*Harald Walach*
